THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U.S.C., 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW.

EXPLANATORY NOTES

DECLASSIFIED
EO 11652

GENERAL

This report covering Airfields, Control Air Depots, Specialized Depots and Bombing and Gunnery Ranges in which the War Department had a real property interest or for which a real property interest was in the process of being acquired for Air Reserve and/or Transient Service facilities as of 1 October 1946, was prepared for use in determining policy and in planning within Hq, AAF and in accordance with instructions contained in Hq, OI 20-52, 12 June 1944. The data contained herein embraces those facilities within the physical boundaries of the installations listed (with the exception of radio range installations.) No attempt has been made to include such off-base related facilities as warehouses, prophylactic stations, office space, etc.

The airfields included in this report consist of all main bases, subbases and auxiliary fields contained in Lists 1, 2, 2A, 2B, 3, and 3A of the Interim Installations List, dated 11 February 1946, revised as of 1 October 1946.

This report was compiled from the AAF Real Property Records and Reports of the 140 series submitted by the commands in accordance with the requirements of AAF Reg. 15-140, dated 9 September 1944, as amended, and supplemented with other data available in the Air Installations Division, AC/AS-4 and the Office of the Chief of Engineers.

NAME AND LOCATION

The Official name of each airfield together with the name of the nearest city or town listed in this report is the same as the official name used in the 1 October 1946 issue of the AAF Installations Directory. No attempt has been made to include the other names shown in the Directory for various airfields.

ELEVATION AND POPULATION

The Elevations shown are those contained in 1 October 1946 issue of the Airman's Guide, compiled by the Civil Aeronautics Administration.

The population figures are in accordance with the 1940 census prepared by the Bureau of the Census of the Department of Commerce.

REAL ESTATE CODE

In order to furnish specific real estate information essential for planning and policy making, the real estate code has been used to indicate (1) the applicable real property interest; whether totally owned, totally leased, or combination owned or leased; (2) the use arrangement, whether or not exclusive military use has been secured; and (3) the maintenance commitment, whether the maintenance costs are to be totally borne by the War Department or are to be shared proportionally with non-military interests. Code numbers used are defined in the following tabulation:

- Totally owned by the War Department.
- Totally leased by the War Department with exclusive military use and with maintenance costs totally borne by the War Department.

- Totally leased by the War Department with exclusive military use and with maintenance costs shared proportionally with non-military interests.
- Totally leased by the War Department without exclusive military use and with maintenance costs totally borne by War Department.
- Totally leased by the War Department without exclusive military use and with maintenance costs shared proportionally with nonmilitary interests.
- Combination War Department owned and leased with exclusive military use and with maintenance costs shared proportionally with nonmilitary interests.
- Combination War Department owned and leased without exclusive military use and with maintenance costs shared proportionally with nonmilitary interests.
- Combination War Department owned and leased without exclusive military use and with maintenance costs shared proportionally with nonmilitary interests.
- War Department occupancy under agreement or permit in force with other Federal agencies.
- War Department lease or permit granted to other agencies for joint use by such agencies.
- War Department lease or permit granted to other agencies for temporary full time exclusive use by such agencies.
- No ownership, no lease, no condemnation contemplated, or maintenance commitment.
- Leased by the War Department without exclusive military use and with maintenance cost totally borne by nonmilitary interests.
- Leased by the War Department with exclusive military use and with maintenance costs totally borne by nonmilitary interests.
- Acquisition in process.

- Proposed for Reserve Flying activities and/or Transient Service facilities; final arrangements not yet concluded.
- Proposed for Transient Service facilities only; final arrangements not yet concluded.
- Proposed for use by Air National Guard; final arrangements not yet concluded.

Code for Bombing & Gunnery Ranges

- War Department owned (No further specific information available)
- War Department leased (No further specific information available)

S. Suspension agreement

P. Permit from other Federal agencies.

LAND - EXCLUSIVE OF BOMBING & GUNNERY RANGES

Figures shown in the column titled "Land Exclusive of Bombing and Gunnery Ranges" does not include land acquired for bombing and gunnery ranges.

BOMBING AND GUNNERY RANGES

The acreages shown are those reported by the respective installation commanders and are subject to change due to reassignment within the commands. Lands shown as acquired by permit are obtained from Federal, State or other public agencies.

MUNICIPAL AIRPORT IMPROVED BY AAF

"Mun" in the column headed "Municipal Airport Improved by AAF" indicates that the subject airfield was originally a municipal airport. When "Imp" is also given, it indicates that the airfield was improved with AAF funds and/or improvements were made with CAA funds under the "Development of Landing Area Program" for National Defense. (The projects under this program were approved by a board composed of the Secretaries of War, Navy and Commerce.)

UTILIZATION

Present utilization was compiled from data included in the Army Air Forces Installation Directory dated 1 October 1946.

Proposed utilization was compiled from the Interim Installations List referred to above.

RUNWAYS, PARKING APRONS, TAXIWAYS & HARDSTANDS

Runway directions are based on azimuth from true North. The length and width of runways indicate only the paved areas and do not include stabilized areas, shoulders and end zones.

The length and width of taxiways and the diameters of hardstands describe only the paved areas and do not include stabilized shoulders.

Parking apron areas show clear parking space and, in general, do not include areas necessary for access to adjacent service buildings.

Types of pavements are described in accordance with the following code:

- ACON - Asphaltic Concrete
- CCN - Cement Concrete, not reinforced
- CCE - Cement Concrete, steel reinforced
- CSAC - Crushed stone asphaltic concrete
- DAST - Double asphalt surface treatment
- DCO - Dust control oil treatment
- EAAS - Earth, stabilized with asphalt
- EACS - Earth, stabilized with cement
- GRAC - Gravel asphaltic concrete
- Graded - Natural earth graded and compacted

- GRAP - Gravel, asphalt penetrated
- SDAS - Sand, stabilized with asphalt
- SDCS - Sand, stabilized with cement
- SHA - Sheet asphalt
- SST - Single asphalt surface treatment

Runway Gross Load Capacity is shown in figures to which the letters C, L, or D have been added indicating Capacity Operation, Limited Operation, or Design Capacity, as defined below. Add three ciphers (000) to all strength figures in this column.

"Capacity Operation" indicated by the letter C, is defined as the use of the runway by airplanes of weights not exceeding the weight indicated on the basis of 100 frequencies a day for a period of 20 years.

"Limited Operation" indicated by the letter L, is defined as the use of the runway by airplanes of weights not exceeding the weight indicated on the basis of 100 frequencies a day for a period of 4 years.

"Occasional Use" is defined as the use of the runway by light weight airplanes during favorable weather conditions only.

The above designations have been obtained from Corps of Engineers evaluations of engineering test reports.

"Design Capacity" indicated by the letter D, is the total gross load for which the runway was designed. This figure is given only when engineering load tests are not available.

KEY PLAN

Runway direction, width and pavements and parking areas have been designated by use of the following symbols.

LEGEND TO KEY PLANS

KEY PLANS ARE NOT TO SCALE.

BROKEN LINES INDICATE WORK UNDER CONSTRUCTION.

RUNWAYS LESS THAN 500' IN WIDTH.

PAVED RUNWAYS MORE THAN 500' IN WIDTH OR PAVED MATS.

PARKING APRONS.

PARKING APRON OF WHICH ONLY SOLID PORTION IS USED BY AAF.

IRREGULAR UNPAVED LANDING AREAS OR UNPAVED RUNWAYS MORE THAN 500' IN WIDTH.

DUST AND EROSION CONTROL

Type of dust and erosion control is shown in accordance with the following code:

- VCP - Vegetative Cover Permanent
- VCT - Vegetative Cover Temporary
- VCA - Vegetative Cover Artificial
- DCO - Dust Control Oil Treatment
- DCG - Gravel Blanket
- DCC - Rough Tillage

GASOLINE DISTRIBUTION AND STORAGE

Types of gasoline distribution are indicated as hydraulic, mechanical, truck, etc. Storage capacity, in gallons, is indicated for on base and off-base storage facilities.

LIGHTING AND RADIO

Types of lighting facilities are indicated as permanent, semipermanent and high intensity.

Types of radio facilities are indicated as control, range and instrument approach. Where instrument approach radio facilities are in the process of being installed an estimated date of completion is shown.

WEATHER

Wind Rose Vectors are to scale. Percentages shown have been rounded to the nearest whole number.

Weather data was abstracted from AAF Installations Weather Studies prepared by the Air Weather Service, Research and Development Division, Hq, ATC. Flight conditions and seasons are defined in accordance with the following:

Closed - Ceiling less than 451 feet and/or visibility less than 1 mile.

Instrument - Ceiling 451 to 950 feet and/or visibility 1 to 2-3/4 miles.

Contact - Ceiling over 950 feet and visibility over 2-3/4 miles.

Spring - March, April, May
Summer - June, July, August
Autumn - September, October, November

Winter - December, January, February.

Where weather data for the installations listed in this report was not available substitute data for a locality of close proximity was used.

HANGARS

Hangar types are given in accordance with standard Army designation with the exception of those indicated as "Special" which are non-standard and in most cases not constructed by the Army.

Clear Floor Area is defined as clear, unobstructed area, with full height, available for parking of planes.

Clear Door opening is defined as maximum clear width and height of door opening. When special tall doors are available, above and at the center line of the regular door, the height given includes the tall door.

ECHELON OF REPAIR

Only 3rd and 4th echelon repair facilities are noted as no attempt was made to indicate facilities available for 1st and 2nd echelons of repair.

HOUSING CAPACITY

Troop housing capacities are based on the following:
120 sq. ft. per Officer, WAC Officer, Nurse
80 sq. ft. per Cadet
60 sq. ft. per Enlisted Man & Enlisted Woman

Troop housing capacities have been indicated for Permanent, Mobilization and Theater of Operations type housing. Capacities do not include hutments and CCC buildings.

Housing capacities for families are indicated as permanent, temporary and conversion. The symbol n/c under "conversion" indicates buildings are being converted to provide the number of family units shown.

UTILITIES

Capacities shown for water and sewage are for a 24-hour period. The notation "Municipal" for water treatment indicates that the water supply is obtained from a near-by town or city.

The notation "Outfall" for sewage disposal indicates that the sewage is discharged, without treatment, into a near-by stream or body of water. Storm sewers are defined as being drainage structures other than open ditches.

PERIMETER FENCING

The type of fencing used as perimeter fencing at Depots is shown in accordance with the following Code:

- CL - Chain Link
- BW - Woven Wire
- BW - Barbed Wire
- W - Wood
